

YieldNodes.com

EXTRAORDINARY YIELDS
AT MANAGEABLE RISK

What is YieldNodes?

In short : YieldNodes basically stakes a large amount of cryptocurrencies (a process called "masternoding"), sells the rewarded coins from staking and shares the profit among its members.

When you start with YieldNodes, they setup servers that masternode and generate coins that are then sold. It is a **rental program** and should be viewed as such. There is **no trading** involved.

Currently YieldNodes operates **between 2000 and 4000** masternodes.

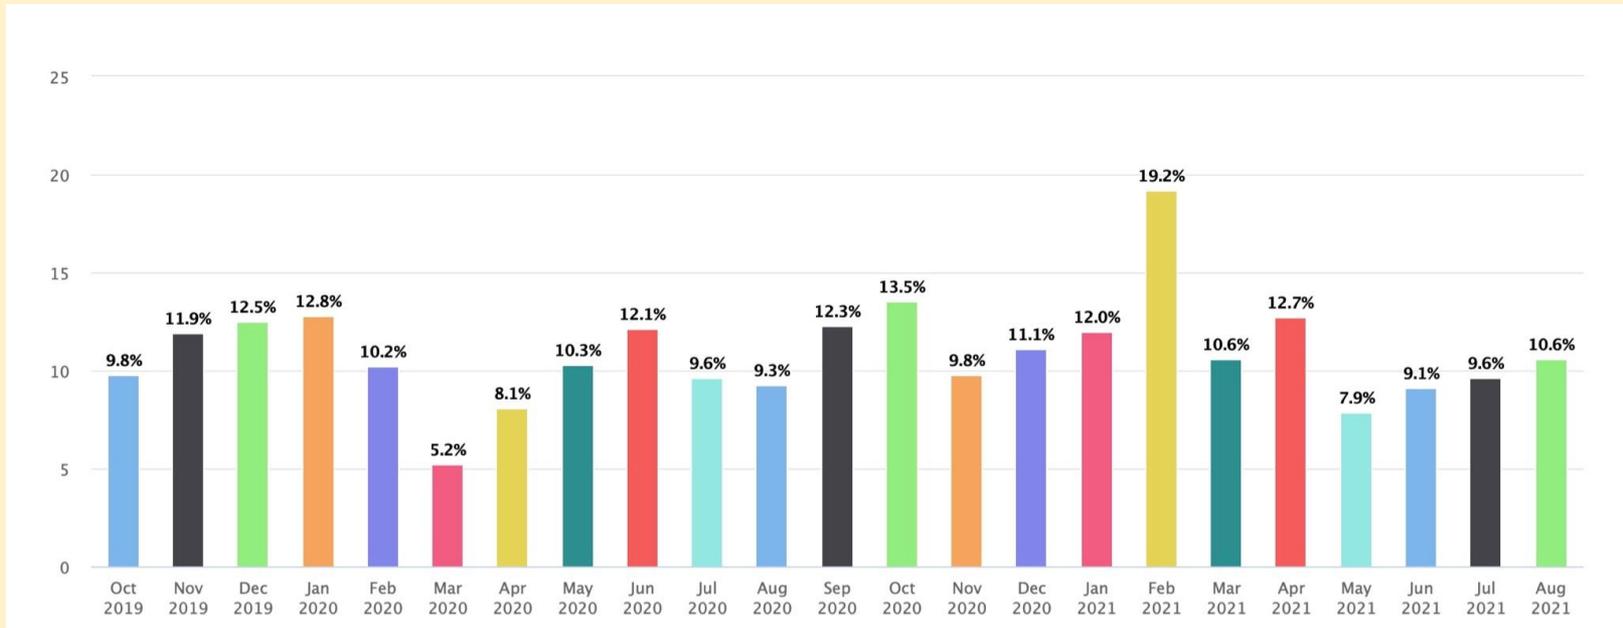

85% of the masternoding earnings are divided amongst members. 15% is kept as an operating fee for further development, affiliate payments (5% of your affiliate's deposits) and maintenance.

The insurance funds is there in case the profits drop below 5% during 3 consecutive months. In that case, your rental payment will be returned along with any accrued profits (if compounded). No fuss – no quibbling!

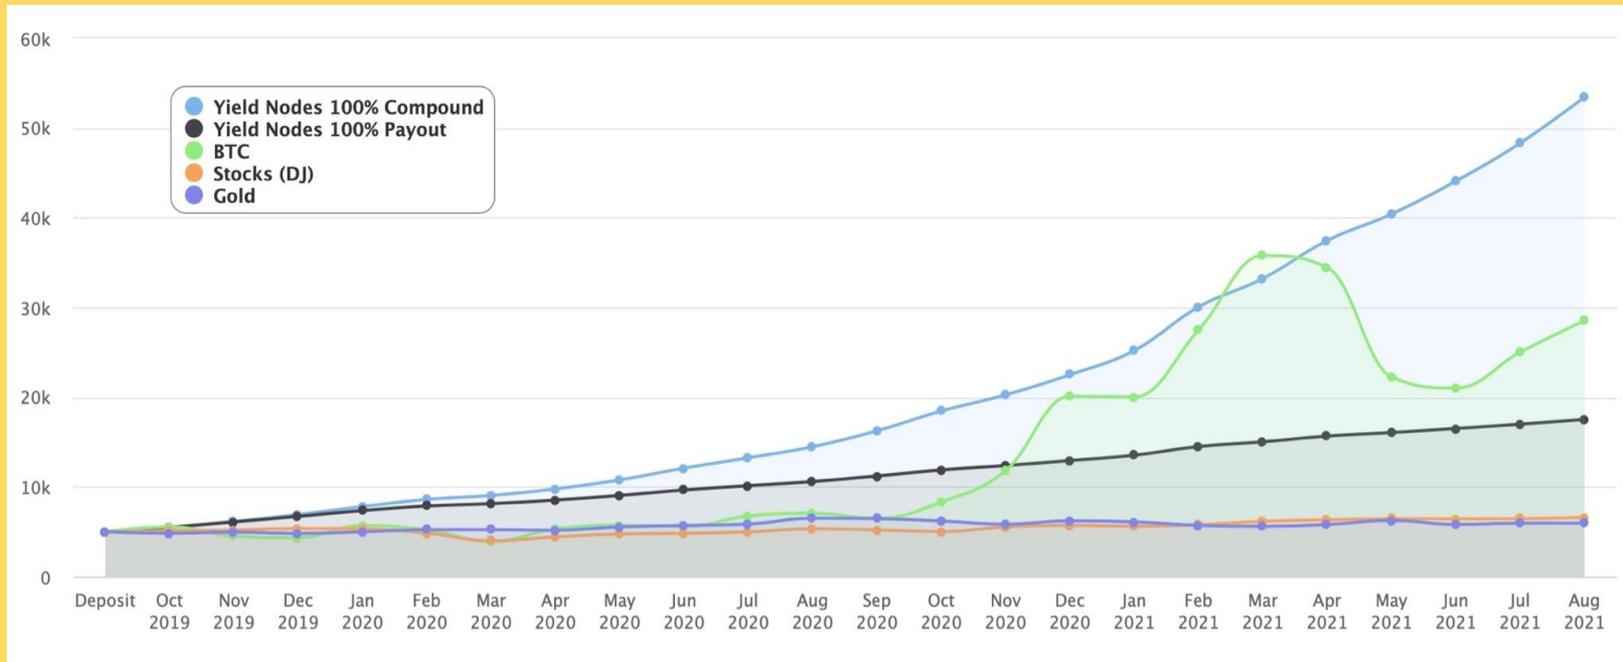

Past performance

Past performance is no guarantee for future results

Performance vs traditional "investments"

Starting with a €5,000 budget

Who is YieldNodes?

Yieldnodes was running as a private pool for over a year before the beta test began in October 2019.

The domain was registered 2019-09-26 ([public info available](#)).

Contrary to many crypto investment platforms, YieldNodes is clear on who's running the company (see right column).

The main company ("DECENOMY PLC") has recently registered in Malta. You can visit the office upon request.

The DECENOMY PLC will be the holding company for all their coins and services. Under it, different companies will be established in different European countries, which will use the legal avenues available there. For the coins, they will use a Limited Company in Malta, the YIELD LTD. They use Malta to optimize their overall crypto tax situation.

In contrast to many other projects, YieldNodes is seeking regulation for the coins and services subject to supervision in Switzerland.

It is now necessary to create the legal structures to make DECENOMY sustainable. For all its idealism, DECENOMY has to abide by the given laws and rules in the existing real world economy.

The core team

Steve Hoermann: CEO & CMO

<https://www.linkedin.com/in/stefan-hoermann-09886314a/>

Urs Schwinger: COO & CIO

The future: YieldNodes "Decenomy"

Mentioned on the previous slide, the Decenomy PLC will be an umbrella company for YieldNodes and several cryptocurrency projects they've acquired.

3 of those projects (Sapphire, 777 Jackpot and Trittium) made it in the TOP 10 best performing masternodes in 2020:

<https://yieldnodes.com/#network-section>

<https://masternode.buzz/best-performing-masternodes-in-2020/>

You can use their token "Sapphire" for everyday purchases from Amazon, Netflix, Apple, Android, and many others. Or masternode it yourself to earn 50-60% more coins. Or just HODL it and let it appreciate in value in it's own Sapphire wallet.

You can withdraw earnings from YieldNodes in Bitcoin or Sapphire.
Diversification is key!

YieldNodes and transparency

YieldNodes is unique in its transparency, honesty and *down-to-earthness*.

Recently, their COO Urs Schwinger shared this in a company update:

Now, I want to address an important point of human nature...

The fact is, people love to make projections and anticipate gigantic sums of money in their YieldNodes account from 10 years of compounding their returns. As much as we'd all love that to be true, it hurts to burst this bubble because it's very unlikely that such numbers will ever be achieved.

The reason is simple - the returns of YieldNodes and the chains will ultimately reduce gradually, and you need to be prepared for that eventuality as we want to solidify YieldNodes and maintain its sustainability.

This isn't a bad thing at all, because we will solidify the foundations and ensure that you can profit well into the future with use cases and coin adoption. The mantra here for 2021 is to lay the foundations with businesses that use our products, and we're well on our way!

We're building this with conviction in order to have a business that we can pass to our children - one that changes lives!

The YieldNodes Monitor Group

This is an independent group, monitoring everything YieldNodes does. They release weekly reports and often have interviews with Steve Hoermann, the CEO of YieldNodes.

Getting started with YieldNodes

You have seen how YieldNodes is a **successful** business.

You have seen how YieldNodes is a **transparent** business.

You have seen how YieldNodes is **prepared for the future**.

If you are ready to register and start off with this amazing opportunity, please use my link to get started:

<https://yieldnodes.com/?a=1AOdLoAVz0XK0NP>

You can find detailed steps on the next slide.

Thank you :-)

Registration steps

1. **Register** an account and complete the KYC* process using this link: <https://yieldnodes.com/?a=1AOdLoAVz0XK0NP>
2. **Fund** your account using Bitcoin, VISA, MasterCard or bank wire (€500/\$600 minimum)
3. After a 7 day "**grace period**" to setup the server, your deposit will start generating 5-15% yield monthly.
4. You can automatically **compound** your earnings, partially or completely.
5. Because YieldNodes buys and sets up masternode servers, which requires some work, your **deposit is locked** for the first **6 months**. This is to prevent users from going in and out too soon, and generating a lot of overhead work.
You can start withdrawing your monthly earnings from the first month.
6. **Withdrawal requests** must be sent by the 15th of the month, in order to dissolve the master nodes. Funds will be paid out to you on the 4th of the following month if you withdraw in Sapphire, the 8th if you withdraw in Bitcoin.
7. There is also an "**Emergency withdrawal**" procedure in case you need to withdraw all your assets in case of emergency (25% fee applies).
8. For any questions, you can reach out to info@investorpromo.com
9. Enjoy the success of YieldNodes!
